ABSTRACTED-PUB-NO: DE 19927689A

BASIC-ABSTRACT:

NOVELTY - Oral dosage formulation (A) contains tramadol (I) and diclofenac (II) and/or their salts, and has each active ingredient in a separate sub-formulation in the same (A).

ACTIVITY - Analgesic.

USE - (A) are used to treat pain.

ADVANTAGE - (I) and (II) can be combined without affecting their release profiles or reducing bioavailability, and the tablets provide both an immediate dose, for rapid pain relief, and long-term therapeutically effective plasma levels. Particularly the tablets need to be taken only once or twice a day.
